

POSTERS

A narrative of virtual and augmented reality in the forest sector

Laura Peedosaar

Assessing drivers of plant mortality under extreme drought: a study case in the Mediterranean shrubland of South East Spain.

Samantha Ruiz Yanetti

Assessment of post-fire Erosion Barriers on vegetation recovery using RPAS and Time-Series NDVI Sentinel-2 Data

Fernando Pérez-Cabello

Best Practices for recovering pasture habitats by means of scrub clearance. LIFE OREKA MENDIAN

Francisco Javier Pérez Pérez

Challenges and successes of a private ecological restoration project in a degraded area of Chilean Patagonia

Elena Sobakina

Contribution of planted fields at a Lignite Center to climate change mitigation and atmospheric quality

Kalliopi Radoglou

Development of soil microflora in reclaimed lands disturbed by copper mining

Veneta Stefanova

DRAINED RAE BOG – FOREST EXPERIMENTAL AREA IN NORTH ESTONIA

Katri Ots

Effect of fire severity on the vertical structure of two forest ecosystems in Galicia

Otilia Reyes

Evolution of the helophite and woody vegetation in two reaches of the Turia River

María Sánchez Murciano

Fire severity and natural regeneration in *Quercus robur* woodlands versus *Eucalyptus globulus* plantations

Oscar Cruz de la Fuente

Habitat preferences of diurnal raptors in exotic Eucalyptus plantations under smallholder forestry

Navila Monteagudo

Identifying in-stream habitat restoration hotspots in the Gilort River Natura 2000 site, Romania

Cristian Tetelea

Improving herbaceous species selection for restoration: multifactorial habitat modelling based on the plant database Anthos

Pepa Aroca-Fernández

Isolation and characterization of plant growth promoting bacteria in the rhizosphere of *Pinus sylvestris* L.

Irene Ariadna De Lara del Rey

LIFE Nardus & Limosa: Combining phosphorus removal with maintaining meadow bird populations

Stephanie Schelfhout

Maintenance of *Leucanthemum vulgare* and *Achillea millefolium* in meadow sward in fifth year after oversowing

Maria Janicka

Marine hypoxic sediments remediation: testing in-situ and ex-situ remediation methods

Cesar Bordehore

Monitoring land degradation processes and restoration actions through remote sensing tools: the NewLife4Drylands project

Vicenç Carabassa

Network AgriPVplus - Linking restoration measures to crop production and solar power generation

Sandra Dullau

Restoration strategies in boreal forests: Differing field and ground layer response to ecological restoration by burning and gap cutting

Clara Espinosa del Alba

Restoring habitat diversity in intensively-farmed agricultural landscape Results of LIFE Ostrovné lúky, Slovakia

Adriana Brossmannova

Role of fire recurrence and severity in the specific composition and diversity of species in a Pinus pinaster forest

Sheila F. Riveiro

Safeguarding success: exploring community engagement strategies that support long-term restoration success in European wetlands

Stijn den Haan

Single treatment of invasive Asclepias syriaca is not enough: lesson from a long-term succession study site

Anikó Csecserits

Social acceptance of the use of reclaimed water for agricultural irrigation

Maria Pilar Mañas Ramírez

The population of Lagochilus vedenskyi changes by global warming in the Kyzyl-Kum desert, Uzbekistan

Akbar Akhmedov

THE RESTORATION OF NATIVE FORESTS IMPROVES THE CONNECTIVITY OF THE GREEN INFRASTRUCTURE IN THE URDAIBAI BIOSPHERE RESERVE

Lorena Peña López

The re-vegetation of wood ash and oil shale ash treated Puhatu cutaway peatland in NE Estonia

Katri Ots

The use of excavated soils in quarry restoration: can it favor biodiversity?

Montse Jorba

Trees from the fog: restoring degraded landscapes using fog capture ecotechnologies Vicenç Carabassa

Urban grasslands experiment: effects of soil and mowing regime on biodiversity and amenity value

Ellen De Vrieze
